Skills

I am a Software Development Engineer with a strong background in Unity3D and C#. My expertise extends to high-performance development using Unity ECS and creating multiplayer systems with both Socket.io and Netcode for Entities. I have a deep understanding of core software engineering principles, including SOLID, and I apply a wide range of design patterns such as Singleton, MVC, Observer, Command, State, and Object Pooling to ensure code is clean, modular, and maintainable. I am proficient with the Unity Test Framework, which helps me deliver high-quality code and debug efficiently. I am looking for a role where I can apply my development skills to create engaging and polished products.

Work history

2025-07 - Current	Software Development Engineer III <i>Mobile Premier League (MPL), Bangalore</i> Engineered a central feature designed for seamless integration into various game projects.
2022-10 - 2025-07	Senior Software Engineer <i>Quest Global, Bangalore</i> - Developed a Unity ECS level design tool with interactive inventory system and save functionality. Contributed to simulation projects using Unity3D. - CI/CD- Build Automation using Cake(C# make) and Jenkin's
2021-04 - 2022-10	Software Engineer/Unity Developer <i>Pole To Win India Private Limited, Bangalore,India</i> - Developed a across-platform Avatar Selector Application for Android, iOS, WebGL, and Desktop, facilitating seamless communication between Unity and native platforms. - Built an endless runner game, applying Zenject for robust dependency injection.
2018-06 - 2020-12	Software Engineer II <i>Juego Studio Private Limited, Mangluru</i> Developed three endless runner and casual games, integrating unique features like drawing mechanics and real-time chat functionality via socket technology.

Design
Pattern(SingleTon,Observer)

Zenject

Build Automation (Jenkin's,
C# Make)

Version Control (Git,plastic
SCM)

Platform (Android, iOS,
WebGL, Desktop,AR)

State,Command,MVC
